

## DUS 360 Release Notes – July 2021 release

Fannie Mae has implemented the July 2021 release and the features are now available.

### Key Release Highlights

- A new “Other Green Requirements” dashboard to manage Servicer-delegated inspection forms and facilitates the exchange of information for other properties in jurisdictions that legally require energy and water benchmarking (Covered Building).

### Detailed Description of Changes

- DUS Property Monitor team, which is now part of DUS 360 team has introduced a new "Other Green Requirements" dashboard to allow servicers to submit delegated Green Rewards inspection forms.
- The dashboard also facilitates the receipt of documentation for other properties in jurisdictions that legally require energy and water benchmarking (Covered Building).
- Dashboard features include the ability to filter columns to aid navigation to the desired record, ability to export records for data analysis and reporting, and a comments field with the ability to send real-time notifications to manage collaboration.
