

Fannie Mae Green MBS At-A-Glance

Global Leader in Multifamily Green Financing

The mission of Fannie Mae's Multifamily Green financing business is to target positive, measurable impacts to environmental, social, and financial metrics, also known as the "Triple Bottom Line." Since launching its first Multifamily Green Mortgage Loan product in 2012, Fannie Mae Green MBS issuances have exceeded \$110 billion through year-end 2022.

The Green Mortgage Loan products offered through Fannie Mae's Delegated Underwriting and Servicing (DUS®) business include:

Green Rewards

Rewards owner's initiative to rehab or retrofit an existing multifamily property, including workforce and seniors housing

Green Building Certification

Distinguishes owner's initiative to achieve a nationally or internationally recognized third-party certification

Fannie Mae securitizes these loans and issues them to the market as Green MBS. Fannie Mae also re-securitizes a portion of the Green MBS volume as REMICs through its Guaranteed Multifamily Structures (GeMS™) program. The energy and water scores¹ for each Fannie Mae green security are available in [DUS Disclose®](#).

In 2022, Fannie Mae issued nearly \$9.1 billion in Green MBS and \$781 million in Green MBS-backed GeMS tranches.

The projected impact of Fannie Mae's over \$110B in Green MBS issuances includes:

Social: \$187 average annual energy and water cost savings per family* and 1.0 million improved or Green Building Certified units

Environmental: 11.8 billion kBtu of energy savings, 9.1 billion gallons of water savings, and approximately 759,000 metric tons CO₂e emissions avoided annually

*Green Rewards loans originated through year-end 2022

DUS MBS

- Generally backed by a single multifamily loan
- Stable cash flows that are easy to model
- Superior call protection
- Positive convexity
- Definitive final maturities of 5-, 7-, and 10-years

**Fannie Mae's
guaranty of
timely payment
and interest**

GeMS REMICs

- Backed by previously issued Fannie Mae Multifamily MBS
- Structures offering block size, collateral diversity, and pricing closer to par
- Material economic interest may be retained by Fannie Mae

¹ Scores available at-issuance and ongoing for Green Rewards. For loans secured by a property with a Green Building Certification, only ongoing scores are available.

Fannie Mae Green Bond Requirements

Requirements	Green Rewards	Green Building Certification
Eligibility	Property owner must commit to property improvements that are projected to reduce the whole property's annual energy usage by at least 15%, with combined energy and/or water savings totaling at least 30%.
